

Care is something that we can pass to the community at large

Patient Network - Empathy Network of People affected with Hepatitis B & C

Has Hepatitis B ever affected you or anyone you love? Have you ever faced discrimination because of your status of Hepatitis B? Want to care for someone who is suffering from it but don't know how.? You don't have to suffer alone.

Patient Network is a platform where you can -

- share your voice
- unwrap the unsaid feelings
- share the challenges or stigma and discrimination you face
- relate and share your experiences with your peers
- relay your day to day experiences and other issues that needs to be re-addressed

You can tell us your stories!

Patient Network at ILBS provides a safe space for you. Share your story, your fight, your challenges with Hepatitis B. Your story can inspire others to step forward and seek help. Your stories can help people become aware of their status by getting tested.

Help people living with hepatitis to live more

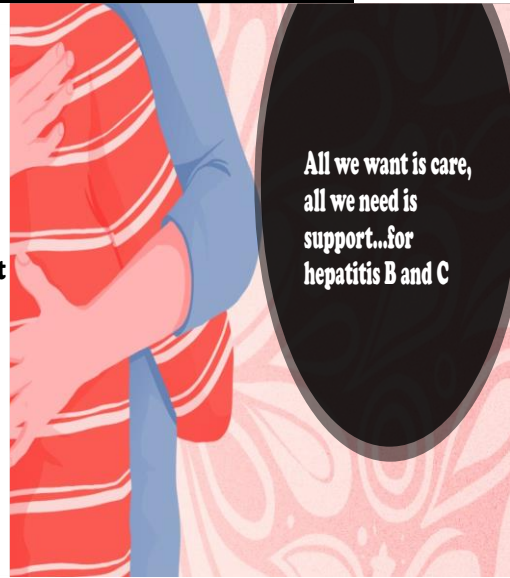

We need a supporting hand to pull us up,
not to push us down...

LET'S FIGHT HEPATITIS VIRUS, NOT PEOPLE SUFFERING FROM IT

Let us extend a hand, not
a glare...Let's support
people with hepatitis B
and C

All we want is care,
all we need is
support...for
hepatitis B and C
